

Subwoofer Overview 2025

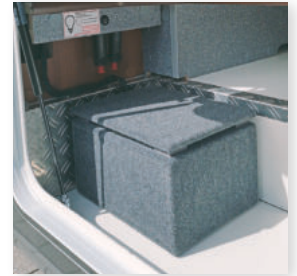

ABOUT THE PRODUCTS

JEHNERT[®]
AUTOMOTIVE SOUNDSYSTEME

These are passive subwoofers that require an amplifier for connection. All subwoofers have a 4.8 m "plug & play" connection cable and are powered by the digital 5-channel amplifier in an energy-saving way.

SAFE'N'SUB

The new security concept sets the tone!

The JEHNERT bass-reflex subwoofers are available in different versions, specially designed for recreational vehicles with limited space. Despite the small cabinet volume, they provide maximum sound quality and support the sound concept in the low frequency range.

But where to put a subwoofer? Often the decision is made in favor of the position under the passenger seat: safe or subwoofer.

This can now be combined. With the new Safe'n'Sound series, the 165mm subwoofer ensures spirited sound dynamics.

The subwoofer safe is available in different versions, so that, for example, the model for the MB Sprinter W907 fits perfectly under the passenger seat and houses a safe measuring 12 x 29 x 11 cm.

The safe, made of 3 mm SM steel, is produced by the company Mobil-Safe "Made in Germany" and is coated with an impact- and scratch-resistant powder and equipped with a double-bit security lock.
